Buy one get two free:
comparison of a "pathological" block (on the left) which costs the same while being 3 times bigger (4MB) than the healthy block (on the right).
(Assumed fee rate: 1 sat/vbyte)
Anomaly is caused by mispricing (so-called "SegWit discount") introduced in Bitcoin in 2017. Bug report:
github.com/bitcoin/bitcoin/issues/29146
